

TelAdept Reduces Expenses and Recovers Overcharges for a Florida Chemical Company.

Gainesville, FL – September 2, 2004 – TelAdept, LLC, formally a division of KineticWorks, Inc., started managing AllChem Industries telecom services in February 2003. The initial project was to optimize their existing telecom expenses.

During the inventory and service verification phase, the experienced staff at TelAdept realized that AllChem was being overcharged by their current long distance carrier. After further investigation, a historical audit and subsequent deliberations with the carrier, the team at TelAdept recovered over \$28,000 in previous billing errors for AllChem.

As part of TelAdept's on-going Telecom Management program and the migration of AllChem's local and long distance service to a more competitive pricing structure, their total telecom expense was reduced by over 30% annually.

About TelAdept
