

TelAdept's Telecom Management Solutions Save the Nation's Largest Real-Time Closed Captioning Company Over \$20,000 Per Month in Telecom Expenses.

Denver, CO. – February 6, 2006 – TelAdept, LLC, formally a division of KineticWorks, Inc., first began managing Caption Colorado's telecom services in 2002. During the no obligation assessment, the team at TelAdept uncovered over \$5000 in monthly overcharges from their current long distance carrier.

Paralleling the overcharge recovery project, TelAdept performed a competitive analysis on all of Caption Colorado's existing telecom services. After negotiating with several carriers, we selected a service provider that ultimately reduced their local and long distance telecom expenses by nearly \$15,000 per month.

As part of TelAdept's on-going telecom management services, Caption Colorado continues to reap the benefits of continual rate optimization. The latest effort further reduced their long distance expense by over \$5000 per month.

About TelAdept

TelAdept is a telecom management outsourcing company based in Denver, Colorado. Our experienced professionals leverage carrier and client-side expertise to conduct in-depth assessments, craft custom solutions, and skillfully manage your services to increase savings, reduce management hassles, and provide expertise - all with a single point of contact.

About Caption Colorado

From traditional news and television captioning to real-time streaming media captioning services, Caption Colorado is the nation's premier provider of captioning services. We develop the technology to empower the deaf and hard-of-hearing and provide you with ADA and Section 508 compliant solutions.
